Susan -

Thanks for passing this along. I will share it with Jared and the rest of the R9 crew. Will you send it to Horst?

I hope your flight home was uneventful.

Stay warm!

- Kathy

Kathy –

Perhaps you got this as well? It does look like a cc and that he did indeed file it with FS.

Subject: FEIS for Rosemont Mine

Dear Susan Bromm,

I have attached a letter of objection to the FEIS on the Rosemont Mine project. I have a home that is in Singing Valley North, the closest residential subdivision to the proposed mine. Not only has the Forest Service not adequately addressed my concern about my well running dry, they have suggested that we enroll in the well protection plan offered by Rosemont Mine. That "protection" plan offered no guarantees of water, only new well pumps and deepening our wells in an attempt to find water. This clearly is not a solution.

Thanks for your consideration.

Cordially,

Sinclair Browning
